

Project Law Report

Web Apps Group 08

Elliot Greenwood, Paul Liétar, Michael Radigan & Jamie Lane

1 Summary

The only sections which require comment are LGPL and GPL. We are justified in using these as we are not distributing. We would be within our rights to distribute however as we are dynamically linking. We are hosting our app on heroku subject to their "hobby dev" rules.

2 List of packages by license

2.1 BSD/MIT/Apache 2.0

For our purpose, these licenses are close enough to equivalent as not to matter. Particular attention has been paid to codemirror,/sweetalert and jquery as we distribute the source for these files.

- | | | |
|---------------------------|--------------------------|--------------------------|
| • antage/eventsource | • ugorji/go | •/sweetalert |
| • fsnotify/fsnotify | • kevinbeaty/any-promise | • tsify |
| • gopherjs | • petkaantonov/bluebird | • vinyl-source-stream |
| • gorilla/* | • substack/browserify | • rust-lang |
| • kardianos/osex | • codemirror/codemirror | • go-lang |
| • lib/pq | • debuglog | • mruby |
| • lucasb-eyer/go-colorful | • eventstream | • typescript |
| • namsral/flag | • gulpjs/gulp | • _buttons.scss |
| • neelance/sourcemap | • gulp-sass | • bootstrap |
| • nu7hatch/gouuid | • gulp-typescript | • various rust libraries |
| • spfl3/cobra | • gulp-typings | • tailhook/quick-error |
| • spfl3/pflag | • jquery | • plietar/* |
| • stretchr/testify | • sass-module-importer | • egnwd/* |

2.2 LGPL

- libseccomp

2.3 GPL

- gcc
- bash
- linux
